THE JOURNAL OF
LOGIC PROGRAMMING

VOLUME 40, NUMBERS 1, 2 and 3, 1999

CONTENTS

Regular papers

Semantics of (disjunctive) logic programs based on partial evaluation
S. Brass and J. Dix **1**

An approach to declarative programming based on a rewriting logic
J.C. González-Moreno, M.T. Hortalá-González, F.J. López-Fraguas and M. Rodríguez-Artalejo **47**

An algebraic framework for the definition of compositional semantics of normal logic programs
P. Lucio, F. Orejas and E. Pino **89**

Special issue

Guest editors' introduction
S. Muggleton and D. Page **125**

Generalization by absorption of definite clauses
K. Taylor **127**

Induction of logic programs by example-guided unfolding
H. Boström and P. Idestam-Almquist **159**

Numerical reasoning with an ILP system capable of lazy evaluation and customised search
A. Srinivasan and R. Camacho **185**

A study of relevance for learning in deductive databases
N. Lavrač, D. Gamberger and V. Jovanoski **215**

Optimizing general chain programs
A.D. Rieger **251**

The complexity of revising logic programs
R. Greiner **273**

Author Index – Volume 40 **299**

Subject Index – Volume 40 **301**
